

# ABSTRACT OF THE DISCLOSURE

The invention relates to an article superior in making a waterdrop slip down a surface of the article. This article includes a substrate; and a functional film formed on a surface of the substrate. This functional film contains : (a) a silica forming a matrix of the functional film; (b) a silylated-terminal dimethyl silicone represented by the general formula [A], the ~~dimetyl~~ dimethyl silicone being in an amount of from 0.1wt% to 10wt%, based on a total weight of the silica; and (c) a fluoroalkylsilane represented by the general formula [B].
